WARBIRD HEALTHCARE & OneStream™

OneStream's Intelligent Finance Platform

Impact of Multiple CPM Products or Disparate Systems:

- **Lack of accurate, timely reporting** across hospitals, health systems, and physician clinics, adversely impacting the value of financial reporting
- **Cumbersome and manual** process, negatively impacting fiscal decision making
- **No "single source"** of financial data truth
- **Financial reporting and tracking** is inconsistent across the organization
- **Organizations need data analytics** translated into actionable information
- **Too complicated and costly** to roll-out additional capabilities of current systems

## There is An Alternative for Healthcare Organizations

In today's volatile and sometimes disruptive economic environment, the healthcare industry faces new challenges daily. Healthcare CFO's and their finance organizations must lead organizational decision-making processes with accurate insight, speed, and confidence that aligns with the strategic and operational needs of the hospital, health system, or physician clinics. Yet many finance organizations are still bogged down by inconsistent and disparate systems and processes, making it difficult to shift time to value-added analysis and decision support. That's why over 1K CFO's and other finance leaders around the globe, from mid-size to some of the largest organizations in the world, are choosing OneStream's Intelligent Finance platform as the foundation for their future. OneStream eliminates the risk, and complexity of data integration, validation, and reconciliation between multiple products, applications, or modules...**making connected CPM suites and disparate systems a thing of the past.**

Unleash the Power of Finance

Hospitals, health systems and physician clinics can unleash the power of their finance department by unifying the financial close, reporting, planning and analytics through a single, extensible solution provided by Warbird and OneStream

- Empower decision-makers with financial and operational actionable info via analytics
- Support decisions with true, real-time data
- Provide reporting on physician productivity and profitability, including tracking downstream revenue
- Improve patient satisfaction by translating data into action
- Create and maintain customized dashboarding for the organization
- Eliminate questions and inaccurate data by providing consistent reporting across your hospitals and physician clinics
- All in a unified platform designed to continually evolve and scale with your health system

ELIMINATE RISKS AND COSTS OF MANAGING AND UPGRADING FRAGMENTED CPM APPLICATIONS AND DISPARATE SYSTEMS
